

Django Task

Greetings from Relu consultancy,

Congratulations, you have been shortlisted for the coding round.

The details of the test are mentioned below . Kindly read all the instructions and reply with submissions on this email **ONLY**.

Task:

Create **REST APIs** based on Django with **PostgreSQL** database. It should contain:

1. User Sign Up/Forgot Password APIs.
2. Uses JWT authentication.
3. Must define 3 user levels: 1. Super-admin, 2. Teacher, 3. Student (Use internal Django Groups to achieve the same).
4. Teacher must be able to add/list the students.
5. Admin must be able to add/list every user in the database.
6. Students must be able to see his information only.
7. Code should be commented for clarity.

You must remember the following points while submitting, otherwise your submission may be rejected.

Submit your task at - <https://forms.gle/3NXcax4TYjb6mTxD7>

1. Upload Project GitHub link in "Task Link" Section.
2. Add Your Name and contact number in the form.
3. You can add comments (additional information you want us to know in your submission) in the "Feedback/Instructions to use" Section.
4. Please attach your resume.

Deadline to submit is **two days** from the date on which you received this task.

Best Regards,

HR Team

Relu consultancy.
